

Left/Right Targets training is a biofeedback-based application for improving the left/right weight shifting ability of an individual. Three target sizes (i.e. Easy, Moderate and Hard) are presented to the left or right of center on an image of the BTrackS Balance Plate on the screen. The individual being trained must shift their Center of Pressure (COP) to move a yellow dot into the target zones, and hold it for three seconds. Targets disappear after 10 seconds if a "hit" does not occur. Performance is judged by the percentage of targets hit within a session.

Compared to Baseline, the most recent Post-Baseline results show an increased percentage of targets hit (\*) in six conditions (Total, Left, Right, Easy, Moderate, Hard). There was no change, or a decrease, in the percentage of targets hit in zero conditions.

**Baseline Results**

DATE	DUR	T	L	R	E	M	H	NOTE
