

Front/Back Targets training is a biofeedback-based application designed for improving front/back weight shifting ability. Three target sizes (i.e. Easy, Moderate and Hard) are presented to the Front or Back on an image of the BTrackS Balance Plate on the screen. The individual being trained must shift their Center of Pressure (COP) to move a yellow dot into the target zones, and hold it for three seconds. Targets disappear after 10 seconds if a "hit" does not occur. Results are based on the percentage of targets hit within a session.

Compared to Baseline, the most recent Post-Baseline results show an increased percentage of targets hit (*) in six conditions (Total, Front, Back, Easy, Moderate, Hard). There was no change, or a decrease, in the percentage of targets hit in zero conditions.

Baseline Results

DATE	DUR	T	F	B	E	M	H	NOTE
2/1/2018 3:47:02 PM	180	50%	27%	73%	75%	50%	17%	Poor Forward Leaning
FE	FM	FH	BE	BM	BH			
2/4=50%	1/4=25%	0/3=0%	4/4=100%	3/4=75%	1/3=33%			

Post-Baseline Results
