

This test is designed to determine Left/Right and Front/Back asymmetries in the natural standing posture of an individual. Using the percentage of weight distributed across the BTrackS Balance Plate, or Center of Pressure (COP), performance of the person being tested is compared to an idealized position midway between the ankles.

The Left/Right weight distribution for the most recent Post-Baseline result (X) is 49/51. This result is closer than the Baseline result (O) to the ideal Left/Right distribution of 50/50. The Front/Back weight distribution for the most recent Post-Baseline is 55/45. This result is closer than the Baseline result to the ideal Front/Back distribution of 50/50.

Coordinates for the Center of Pressure (COP) location are given below the BTrackS Balance Plate image. Ideal values are equal to zero.

Baseline Results

DATE	L/R	F/B	COPx	COPy	NOTE
2/1/2018 3:47:02 PM	43/57	67/33	2.8	5.6	Initial Visit

Post-Baseline Results

DATE	L/R	F/B	COPx	COPy	NOTE
2/8/2018 3:20:10 PM	46/54	63/37	3.0	4.5	Wk 1 Follow-up
3/2/2018 4:24:24 PM	45/55	63/37	2.2	4.5	Wk 4 Follow-up
4/1/2018 2:27:11 PM	48/52	61/39	1.1	3.5	Wk 8 Follow-up
4/28/2018 3:37:54 PM	49/51	58/42	0.4	2.5	Wk 12 Follow-up
6/2/2018 3:41:18 PM	50/50	56/44	0.0	1.8	Wk 16 Follow-up
8/1/2018 1:44:12 PM	49/51	55/45	0.8	1.7	6 Month Follow-up
